

HIGHWAY 175 CONSTRUCTION UPDATE

April 13, 2023

WATER OUTAGE UPDATE

On Tuesday, April 18th, work will include the installation of 2 main valves that connect the easternmost parts of the system to the Highway 175 corridor. This will result in low pressures or outages for many during the installation process. After installation, it will take significant flushing to get all the air out of the lines.

The good news is, these valves are being placed in strategic areas that should help minimize the number of members affected for future construction and emergency leaks.

WHEN: **Tuesday, April 19th, 2023**

TIMES: 9:00 am until about 12:00 noon

AREAS IMPACTED:

CR 3407, CR 3405, CR 4118, CR 4119, CR 4125, CR 3402
